

What to expect with treatment

Generally, each treatment takes about 15 to 20 minutes. You may need more than one treatment to see best results. Your doctor will discuss when and how often you will receive these treatments.⁵ In most cases, they are spaced about 3 to 8 weeks apart.⁷

When you come in for a PicoWay Resolve laser treatment, a topical anesthetic cream may be given to enhance comfort, but you may opt out of this step.⁶ Some people experience temporary discomfort immediately after treatment.⁵

Check with your PicoWay Resolve provider about any pre- or post-treatment care.

Low to no downtime^{4,5}

PicoWay Resolve treatment has low to no downtime.^{4,5} Patients reported low levels of pain during treatment.⁴ The most common immediate treatment responses included redness, swelling, and pinpoint bleeding that were expected and typically resolved spontaneously in fewer than 3 days.^{4,7}

PicoWay® Resolve is a picosecond laser treatment that works below the surface to transform skin

Resolve
by PicoWay®

INTENTIONALLY BRILLIANT™

⁶ Topical anesthetic was applied prior to treatment in patients who received a double pass with 2 wavelengths of the laser in clinical studies.⁷

Choosing the right wrinkle treatment for you

Millions of people received treatments for wrinkles over the last year.¹ The PicoWay Resolve laser provides a non-invasive, needle-free option for wrinkle treatment.

PicoWay Resolve transforms your skin

- As skin ages, wrinkles can result from reduced collagen²
- Picosecond lasers have been shown to build collagen and elastin below the skin surface³
- After a series of quick 15- to 20-minute treatments, PicoWay Resolve significantly improves the appearance of wrinkles^{4,5}
