

What to expect with treatment

Your doctor will discuss when and how often you should receive treatments. In most cases, they are spaced about 6 to 16 weeks apart.⁷

Low to no downtime^{4,5}

When you come in for a PicoWay laser treatment, a topical anesthetic cream or local injection may be given to enhance comfort, but you may opt out of this step.⁵ In clinical studies, the majority of patients reported mild to no discomfort.^{1,7} The most common immediate side effects included mild redness, swelling, and pinpoint bleeding.^{1,2,7}

Check with your PicoWay provider about any pre- or post-treatment care.

PicoWay removes unwanted tattoos

More people are seeking tattoo removal⁴

More than 40 million Americans have tattoos, and 40% of adults (aged 26 to 40 years) have at least 1 tattoo.⁵ If you are one of the many who no longer want your tattoo, PicoWay can help you remove the unwanted ink!

PicoWay is intentionally designed to remove tattoo ink

- Advanced laser technology effectively clears tattoo ink without breaking the skin surface^{5,6}
- Unlike some other types of lasers, the targeted PicoWay laser system may⁶
 - Require fewer sessions and less time for complete tattoo removal
 - Remove certain colors better, especially blue and green

PicoWay: tattoo removal that works

In one study, **86%** of patients showed at least **50% clearance** of their tattoos after 3 treatments¹

In a different study, **83%** of blue/green tattoos had at least **50% clearance** after 2 treatments⁷
